01 ABOUT

THE THROUGH LINE

Good analysis should *end in a decision.*

I study Finance at the University of Lethbridge's Dhillon School of Business. My strongest work sits between financial thinking and technical execution: building a model, checking the assumptions, and explaining what the result means.

My experience in financial documentation, data validation, retail operations, and

Skip to content t sales has made accuracy practical, not abstract. I am most

01

Investment analysis

Portfolio construction, benchmarking, and risk-adjusted performance.

02

Risk modelling

Stress tests, scenario analysis, and decision thresholds.

03

Business reporting

Turning model output into concise, usable recommendations.

02 EXPERIENCE

PROFESSIONAL HISTORY

Accuracy under
real deadlines.

Four roles across finance support, data quality, customer operations, and financial-product communication.

Skip to content

Explained financial products to customers, supported accurate applications, and handled personal information with care.

Financial products

02

APR – JUL 2025
St. Albert, AB

Sales Associate

Canadian Tire Corporation

Processed more than 300 customer transactions each week while supporting customers and daily store operations.

99.9% accuracy

03

AUG – DEC 2024
Remote

Online Data Analyst

TELUS International

Reviewed data for accuracy, relevance, and completeness against written guidelines while working independently.

Data validation

04

AUG 2022 – FEB 2023
Kathmandu, Nepal

Financial & Marketing Intern

Abbitex Premium

Processed and coded invoices, analyzed sales and financial data, and helped improve documentation and reporting.

100+ invoices / month

01

PYTHON • INVESTMENT ANALYSIS

FAANG Portfolio Analyzer

A Python model that applies Modern Portfolio Theory to compare equal-weight, minimum-variance, and tangency portfolios against the S&P 500.

KEY OUTPUT

1.52 Sharpe ratio

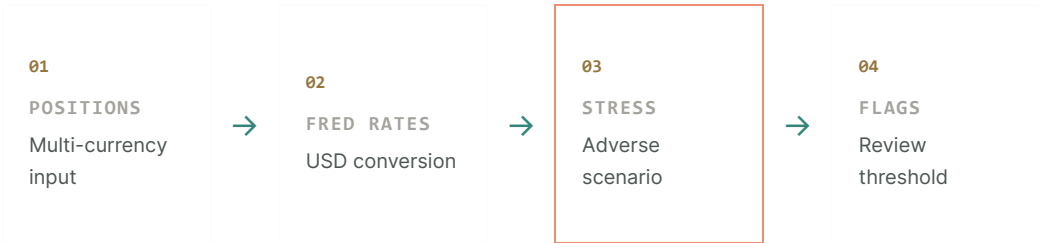

MY CONTRIBUTION

Built the return, volatility, Sharpe ratio, optimization, benchmark, and recommendation logic using two years of market data.

PYTHON PANDAS NUMPY SCIPY YFINANCE

FX RISK / REPORT PIPELINE

10% SHOCK

Skip to content

Currency Exposure Risk Report

An automated report that converts multi-currency positions with FRED exchange-rate data and tests a 10% adverse currency shock.

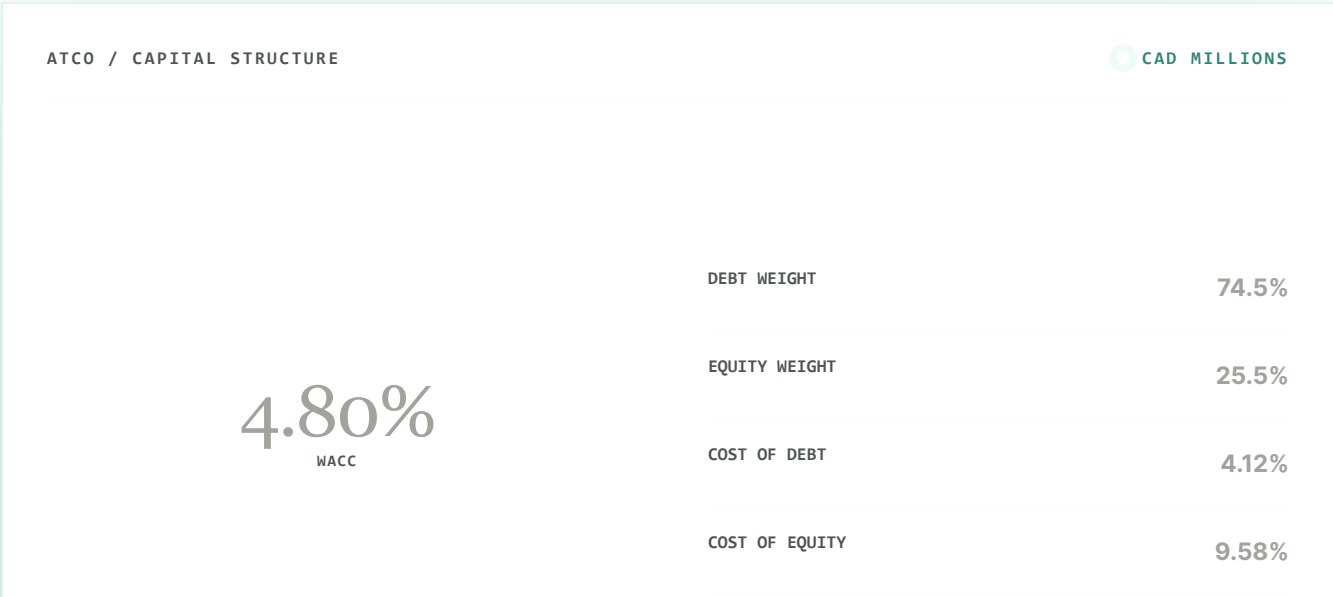

KEY OUTPUT

10% adverse shock tested

MY CONTRIBUTION

Designed the conversion, scenario-testing, risk-flagging, and reporting workflow from input data to decision-ready output.

- PYTHON
- PANDAS
- FRED API
- STRESS TESTING

CORPORATE FINANCE + PRESENTATION

ATCO Cost of Capital Analysis

A group corporate-finance analysis estimating ATCO’s weighted average cost of capital from debt, equity, tax, and CAPM inputs.

KEY OUTPUT

4.80% estimated WACC

MY CONTRIBUTION

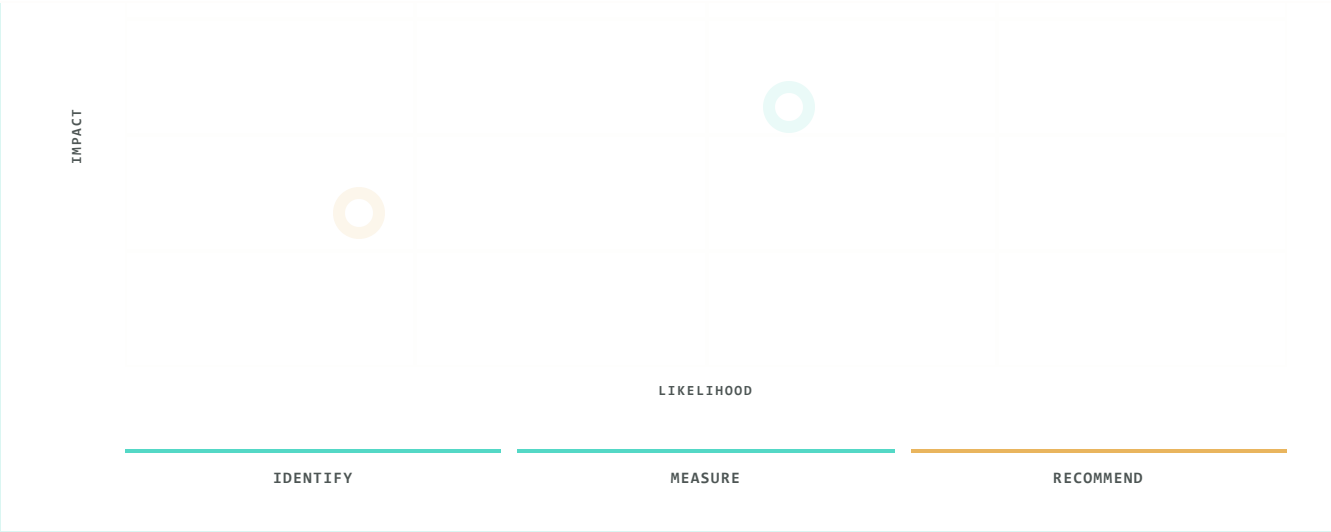

Contributed to the CAPM inputs, cost-of-debt work, capital-structure weights, analysis, and presentation of the findings.

EXCEL CAPM WACC FINANCIAL ANALYSIS

NEXTGEN / RISK CASE

CASE COMPETITION • RISK

NextGen Risk Insurance Case

A live national case competition focused on analyzing a business-risk problem and presenting recommendations to industry judges.

KEY OUTPUT

Four-person university team

MY CONTRIBUTION

Selected as one of four University of Lethbridge students; analyzed the case under time pressure and co-presented the recommendation in Calgary.
