PROJECTS

Portfolio Currency Exposure Risk Report (Python)
DGTR 3720, University of Lethbridge · 2026
Built an automated FX risk report using FRED exchange-rate data; converts multi-currency positions to USD, simulates a 10% adverse currency shock, and flags positions crossing a defined risk threshold.
Tea with Nessie — Mail-Merge Invitation Automation (Python)
DGTR 3720, University of Lethbridge · 2026
Built a Python mail-merge system with openpyxl and python-docx to generate 24 personalized event invitations from an Excel guest list, with automated field validation.
Business Strategy Report — Automotive Market Entry
MGT 4090, University of Lethbridge · 2026
Co-authored a market-entry strategy report analyzing federal policy factors, including tariff-rate quotas and EV rebate program changes, for an automotive brand entering Canada.
Blockchain-Based Supply Chain & Payment Risk Solution
University of Lethbridge · 2026
Collaborated on a supply-chain risk solution involving supplier verification and controlled payment-release conditions to reduce transaction and payment risk.
NextGen Risk Insurance Case Competition
Calgary, AB · Mar 2026
One of four students selected to represent the University of Lethbridge; identified key business risks and co-presented recommendations to a panel of industry judges.
